

WIN Material Intelligence Cloud

Tailored Leadership Versions

This document provides tailored narrative framing for three executive audiences:

- CFO
- COO
- Sustainability and ESG leadership

Version 1: CFO-Focused Narrative

Core Message

WIN Material Intelligence Cloud improves financial performance by reducing decision friction, minimizing reporting risk, and improving value capture from operational actions.

What Matters Most to a CFO

- Better capital allocation decisions based on trusted performance signals.
- Lower operating overhead from reduced manual reconciliation.
- Lower risk exposure from stronger auditability and controls.
- Clear visibility into realized value from optimization initiatives.

CFO Slide Soundbite

This platform gives finance and leadership a trusted value engine, not just another reporting interface.

CFO KPI Lens

- Cost-to-report trend.
- Manual reconciliation hours.
- Exception backlog impact on period-close confidence.
- Realized value from approved recommendations.
- Risk-adjusted return from optimization programs.

CFO Ask

Approve value tracking as a formal finance cadence and tie platform performance to quarterly business reviews.

Version 2: COO-Focused Narrative

Core Message

WIN Material Intelligence Cloud improves operational execution by reducing latency between issue detection and corrective action.

What Matters Most to a COO

- Faster visibility into material performance by account and portfolio.
- Better control of exception resolution flow.
- Standardized operational decision-making across regions and teams.
- Higher execution consistency from measurable workflows.

COO Slide Soundbite

This is an operating system for performance discipline, speed, and accountability.

COO KPI Lens

- Time to detect critical exceptions.
- Time to resolution for priority exceptions.
- Decision cycle time for corrective actions.
- Cross-account performance variance.
- Recommendation implementation rate.

COO Ask

Sponsor cross-functional operating adoption and make this platform the default weekly performance review surface.

Version 3: Sustainability and ESG Leader-Focused Narrative

Core Message

WIN Material Intelligence Cloud improves sustainability credibility by linking reportable outcomes to traceable operational evidence.

What Matters Most to Sustainability Leadership

- Higher confidence in sustainability reporting claims.
- Stronger traceability from source events to final reported metrics.
- Better collaboration with operations and finance on measurable improvement.
- A practical path from performance narrative to verifiable evidence.

Sustainability Slide Soundbite

This platform turns sustainability intent into traceable, auditable, and actionable outcomes.

Sustainability KPI Lens

- Percentage of reportable metrics with complete lineage.
- Number of unresolved report-impacting exceptions.
- Improvement velocity in diversion and material outcomes.
- Confidence rating for external reporting cycles.
- Time required to prepare evidence for audits or assurance reviews.

Sustainability Ask

Align reporting, governance, and operations teams on a shared data confidence model powered by this platform.

Unified Close for All Three Audiences

WIN Material Intelligence Cloud is strategically important because it connects performance, trust, and action in one system.

For finance, it drives measurable value and lowers risk.

For operations, it accelerates accountable execution.

For sustainability, it strengthens reporting confidence and credibility.

Together, these outcomes position WIN to lead with performance and proof.
